OCR Engineering Information Sheet

OCR Cambridge National Engineering Specification:
https://www.ocr.org.uk/qualifications/cambridge-nationals/engineering-manufacture-level-1-2-j823/

Examination Information:

OCR Engineering is assessed at Pass, Merit or Distinction (at both level 1 and level 2). There is 1 external examination (Unit: R014) in May/June 2025 and 2 other units of work, (units R015 and R016) that are assessed internally, that have been on-going since Year 10. There is still a large section of NEA (non-examined assessment) work to complete between now and the examination.

All students will be given a bespoke revision guide which has just come into publication that gives vital and useful information on the examination structure and style of questions, as well as the relevant theory content.

All students will sit the external exams in May/June.

How you can support your child:

A quiet space to work and a regular routine for completing any independent work that may be set are highly recommended.

In order to achieve the best possible overall grade for their Engineering qualification we strongly recommend that students get into the habit of regular revision from now onwards in the lead up to the examination, if they are not already doing so. Also, students should be very careful to read the assignment criteria within any of the assignment briefs that have been issued.

Key Websites:

https://technologystudent.com/ – good for general engineering knowledge and revision
https://www.bbc.co.uk/bitesize/guides/zh4g4qt/revision/1 – good for research and revision about materials.

Moodle:

All resources are available to students on Moodle. It is important that if students are away from school that they catch up on the lessons that they have missed.

If you have any queries at any time, please do not hesitate to contact the Engineering Curriculum Area via the school office: info@ladymanners.derbyshire.sch.uk
